

## Mounting Instructions

2000-01-10 38-080500a

### General

Identify all parts before installation. Installation shall be done in a proper and competent manner. Always follow the instructions. Give the customer all directives and instructions so that these can be kept in the vehicle for future service and maintenance.

Level the drawbar in driving position.

### Mounting

- Press the silent block into the drawbar sleeve. Press against the outer edge of the silent block not to damage the rubber bushing.
- It is not permitted to grind away the toothed surface on the inner tube. The teeth is needed to get a grip against the trailer drawbar bracket.
- Fit the drawbar in the trailer drawbar bracket. Oil and mount the bolts and nuts.
- Position the drawbar in driving position and tighten the bolts. Tightening torque M27 600-650 Nm.
